

Amendments To Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A computer-implemented method for collecting product data to facilitate at least one of searching, viewing and purchasing of products at a single shopping website over a network, comprising:

retrieving, ~~via~~ by a host computer, ~~new~~ product data from a plurality of websites associated with a plurality of at least one of affiliated and non-affiliated providers, wherein said product data is to be provided to a user;

parsing said product data according to data types to determine ~~determining, via~~ by said host computer, ~~that whether~~ a first portion of said ~~new~~ product data associated with at least one of said data types may be entered with added to stored product data based on at least one of said data types;

integrating, via by said host computer, said first portion with said stored product data within a database to create integrated data; and,

providing said integrated data to a user such that said user may utilize a single shopping website to search for, compare prices and order said products, wherein said products are associated with said product data from a plurality of said websites, wherein each of said websites may be associated with a different provider. ~~parsing said new product data according to data types to determine, via said host computer, that a second portion of said new product data may not be entered with said stored product data within said database; and~~

~~adding said second portion to a buffer.;~~

2. (original) The method according to claim 1, wherein said providers comprise merchants.

3. (currently amended) The method of claim 2, wherein determining ~~that whether~~ said first portion may be ~~entered with~~ added to said stored product data comprises matching product producer names and product producer product identifiers from said first portion to product producer names and product producer product identifiers from said stored product data.
